

## **Curvaceous Targets North America with New Agent**

Curvaceous Software Ltd. has appointed Stochos Inc. of Schenectady, New York as a new North American Agent.

Successfully breaking the mould, Curvaceous uses the mathematics of n-dimensional geometry to solve previously intractable problems in Process Improvement, Process Operations, Data Mining and Multivariate Methods with substantial economic impacts. Founded in 1998, UK based Curvaceous Software Ltd is rapidly expanding to keep up with market demand for award winning Geometric Process Control (GPC) technology.

In a recent visit to the Stochos headquarters Dr. Robin Brooks, Managing Director of Curvaceous Software Ltd. was thoroughly impressed;

"Stochos Incorporated is a vibrant company committed to excellence at every level. Their mission to improve the quality of manufacturing processes is echoed and amplified by C:Suite products. New and existing Curvaceous customers in North America will now be able to benefit from this partnership which I believe will be fruitful for all concerned."

Stochos Inc. provides quality computerised solutions to virtually all types and sizes of manufacturers and has been doing so since 1968. They are highly customer orientated and believe that a high quality result of a process is one which achieves the targets set by the client. Stochos, meaning "TARGET", offer complete computerised systems for continuous Process Improvement, Quality Management, Shop-Floor Data Collection, statistical Process Control (SPC), Design of Experiments (DoE) and Nonconformance/Corrective Action Tracking.

Don Holmes, President and Founder of Stochos Incorporated was immediately struck by the benefits Curvaceous promised the consumer.

"Curvaceous Software Ltd. has a great thing going. Their novel Geometric Process Control technology solves problems previously thought insoluble, with ground-breaking benefits such as the first ever method to calculate precise and dynamic Alarm Limits, the first real solution to the PAT requirements in Pharmaceuticals and fundamental enhancements to the Six Sigma and Lean Sigma Process Improvement methodologies. This partnership is a wonderful step forward for North American process industries and the quality of their products."

The future looks bright for Curvaceous as patent holders with an ever-increasing client base of over seventy customers including, for example, AstraZeneca, BAE Systems, BP, DSM, Huntsman Petrochemicals, INEOS Chlor, Lafarge Cement, Nestle and Pilkington Glass. Curvaceous Software is set to expand successfully into the North American market with Stochos Inc. flying the flag.

North American enquiries should contact Don Holmes at +1 518 372 5426 or email DSHOLMES@STOCHOS.COM.
